**Under-five mortality rate**

Deaths per 1,000 live births

Source: GME 2009

**Causes of under-five deaths, 2004**

- HIV/AIDS: 3%
- Malaria: 0%
- Injuries: 5%
- Diarrhoea: 1%
- Measles: 0%
- Pneumonia: 6%
- Other: 36%

Global more one third child deaths attributable undernutrition

**Current nutritional status**

Percentage of children < 5 years old suffering from:

- No Data

**Stunting trends**

Percentage of children < 5 years old stunted

NCHS reference population

- No Data

**Underweight trends**

Percentage of children < 5 years old underweight, NCHS reference population

- No Data

**INFANT AND YOUNG CHILD FEEDING**

**Infant feeding practices, by age**

- No Data

**Exclusive breastfeeding**

Percentage of infants < 6 months old exclusively exclusively breastfed

- 39

Source: IGME 2009, WHO 2008

**Printed 23-Apr-2010**
### Micronutrients

**Vitamin A supplementation**
- Percentage of children 6-59 months old receiving two doses of vitamin A during calendar year
  - No Data

**Iodized salt consumption trends**
- 2,000 newborns are unprotected against IDD (2008)
  - No Data

### Essential Nutrition Interventions During the Life Cycle

#### Pregnancy
- Use of iron-folic acid supplements
- Household consumption

#### Birth
- Early initiation of breastfeeding (within 1 day)
- Infants not weighed at birth

#### 0-5 months
- Exclusive breastfeeding
- Continued breastfeeding at 5-23 months

#### 6-23 months
- Timely introduction of complementary food

#### 24-59 months
- Full coverage of vitamin A supplementation
- Maternal mortality ratio, reported (per 100,000 live births)
- Maternal mortality ratio, adjusted (per 100,000 live births)
- Lifetime risk of maternal deaths (1 in : )
- Total number of maternal deaths

### Maternal Nutrition/Health

#### Drinking water coverage
- Percentage of population by type of drinking water source, 2008

#### Sanitation coverage
- Percentage of population by type of sanitation facility, 2008

### Water and Sanitation

- Drinking water coverage
  - Piped into dwelling
  - Other improved source
  - Unimproved source

- Sanitation coverage
  - Improved facility
  - Shared facility
  - Unimproved facility
  - Open defecation

### Under-five deaths caused by

- Diarrhoea: 1% - 6%

---

*To increase children's chances of survival, improve development and prevent stunting, nutrition interventions need to be delivered during the mother's pregnancy and the first two years of the child's life.*

---

*Information on these policies are being monitored.*
