# Maternal and Newborn Health Disparities in Viet Nam

## Key Facts

### Viet Nam reference table

Demographic indicators		
Total population (thousands) <sup>1</sup>	2015	93,448
Total live births (thousands) <sup>1</sup>	2015	1,582
Total Fertility Rate (number of children per woman) <sup>1</sup>	2015	2
Adolescent birth rate (per 1,000 women 15-19) <sup>10</sup>	2013	36
Impact indicators		
Maternal mortality ratio (per 100,000 live births) <sup>4</sup>	2015	54
Average annual rate of MMR reduction between 1990 and 2015 (%) <sup>5</sup>	2015	3.8
Lifetime risk of maternal death: 1 in x <sup>4</sup>	2015	870
Stillbirth rate (per 1,000 total births) <sup>6</sup>	2015	10
Preterm birth rate (per 100 live births) <sup>7</sup>	2010	9
Under-five mortality rate (per 1,000 live births) <sup>3</sup>	2015	22
Under-five deaths that are newborn (%) <sup>3</sup>	2015	52
Neonatal mortality rate (per 1,000 live births) <sup>3</sup>	2015	11
Neonatal deaths (thousands) <sup>3</sup>	2015	18
Service Delivery		
Availability of EmONC Services (% of minimum acceptable level) <sup>8</sup>	–	–
Physician density (per 1,000 population) <sup>9</sup>	2013	1.2
Nurse and midwife density (per 1,000 population) <sup>9</sup>	2013	1.2

# Maternal and Newborn Health Disparities

## Viet Nam

In 2015, 1,600,000 babies were born in Viet Nam, or around 4,400 every day.<sup>1</sup>

Among young women (aged 20-24), 5 percent gave birth by age 18.<sup>2</sup>

Approximately 49 babies will die each day before reaching their first month<sup>3</sup>; 44 stillbirths occur every day.<sup>6</sup>

### Neonatal mortality rate:

Viet Nam's neonatal mortality rate (NMR)<sup>4</sup> is 11 deaths per 1,000 live births.<sup>3</sup>

NMR in rural areas is 13 deaths per 1,000 live births and 9 deaths per 1,000 live births in urban areas for an urban-to-rural ratio of 0.6.<sup>2</sup>

NMR among the poorest households is 19 neonatal deaths per 1,000 live births, compared to 7 deaths per 1,000 live births among the richest households.<sup>2</sup>

### Neonatal mortality rates, by background characteristics, 2014

### Neonatal mortality rate

for newborns with mothers:

The NMR for younger mothers (24 per 1,000 live births) is 2.7 times higher than for mothers aged 20-34 (9 per 1,000 live births).<sup>2</sup>

**1 in 20**  
young women  
(aged 20-24)  
have given birth  
by age 18.<sup>2</sup>

Newborns born to mothers with no education are

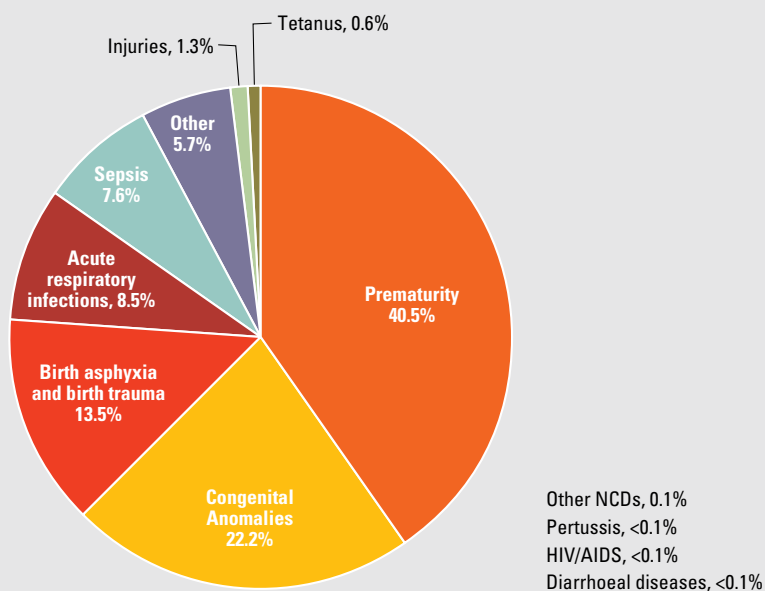

**5.2x**

more likely to die during the first month compared to those born to mothers with a tertiary education.<sup>2</sup>

## Viet Nam – Causes of Neonatal Mortality, 2015

In Viet Nam, the main causes of neonatal deaths in 2015 were prematurity (40.5 percent), congenital anomalies (22.2 percent) and birth asphyxia and trauma (13.5 percent).<sup>11</sup>

## Disparities in key maternal and newborn health interventions, Viet Nam, 2014<sup>2</sup>

		Coverage – care for mothers					Postnatal care of mothers within 2 days (%)
		Demand for contraception satisfied (%)	Antenatal care coverage at least 4 times (%)	Skilled attendant at birth (%)	Institutional delivery (%)	Delivered by caesarean section (%)	
<b>Residence</b>	Urban	92.8	86.3	99.0	99.3	43.3	95.8
	Rural	92.4	68.5	91.6	91.3	21.0	87.3
Residence ratio (urban to rural)		1.0	1.3	1.1	1.1	2.1	1.1

Mother's education ratio (highest to lowest)		1.0	4.9	2.7	2.7	6.0	2.7

## Maternal and newborn health coverage indicators

### By residence:<sup>2</sup>

- In rural areas, 69 percent of women made at least 4 antenatal care (ANC) visits compared to 86 percent in urban areas.
- Coverage of skilled attendance at birth is 92 percent in rural areas, compared to 99 percent in urban areas.
- 97 percent of newborns in rural areas received the BCG vaccine, compared to nearly 100 percent in urban areas.

### By household wealth:<sup>2</sup>

- Nearly all mothers among richest households (96 percent) made at least four ANC visits, compared to 39 percent of mothers from the poorest households.
- 73 percent of deliveries in the poorest households had a skilled attendant at birth, compared to 100 percent of deliveries among the richest households.
- 100 percent of newborns in the richest households received the BCG vaccine, compared to 90 percent among the poorest households.

**73%** of deliveries in the poorest households have a **skilled attendant at birth** compared to...

...**100%** of deliveries in the richest households.

Coverage – care for newborns									Other	
Postnatal care of newborns within 2 days (%)	Newborn weighed at birth (%)	Early initiation of breast-feeding (%)	Exclusive breast-feeding (<6 months) (%)	BCG vaccine for newborn (%)	Hepatitis B vaccination at birth (%)	Tetanus protection for newborns (%)	Birth registration (%)	Births by age 18 (%) <sup>#</sup>		
94.1	98.5	23.8	20.8	99.7	84.4	86.2	96.7	3.2	Urban	Residence

## Selected maternal and newborn health indicators, by region, 2014

## By mother's age:<sup>2</sup>

- 76 percent of mothers aged 20-34 made at least four ANC visits, compared to 55 percent among younger mothers (aged less than 20).
- 95 percent of deliveries among mothers aged 20-34 had a skilled attendant at birth, compared to 87 percent of deliveries among younger mothers (aged less than 20).
- 90 percent of newborns born to mothers aged 20-34 receive postnatal care, compared to 83 percent of newborns born to mothers aged less than 20 years.

## Disparities in key maternal and newborn health interventions, Viet Nam, 2014<sup>2</sup>

Coverage – care for mothers						
	Demand for contraception satisfied (%)	Antenatal care coverage at least 4 times (%)	Skilled attendant at birth (%)	Institutional delivery (%)	Delivered by caesarean section (%)	Postnatal care of mothers within 2 days (%)
<b>National estimate</b>	92.5	73.7	93.8	93.6	27.5	89.8
Red River Delta	92.9	85.2	97.6	99.0	25.5	94.7
Northern Midlands and Mountainous area	89.9	51.7	77.5	76.9	22.2	75.3
<b>Region</b> North Central and Central Coastal area	93.7	70.4	98.5	97.5	32.3	88.9
Central Highlands	89.2	47.7	81.0	80.7	14.5	79.8
South East	92.3	90.0	98.1	97.3	34.8	95.5
Mekong River Delta	94.1	78.0	99.4	99.4	28.1	96.5
<b>Regional performance</b>						
Highest value	Mekong River Delta	South East	Mekong River Delta	Mekong River Delta	South East	Mekong River Delta
	94.1	90.0	99.4	99.4	34.8	96.5
Lowest value	Central Highlands	Central Highlands	Northern Midlands and Mountainous area	Northern Midlands and Mountainous area	Central Highlands	Northern Midlands and Mountainous area
	89.2	47.7	77.5	76.9	14.5	75.3
Ratio (highest to lowest)	1.1	1.9	1.3	1.3	2.4	1.3

## By mother's education:<sup>2</sup>

- 94 percent of mothers with a tertiary education made at least four ANC visits, compared to only 19 percent of mothers with no education.
- Only 37 percent of deliveries among mothers with no education had a skilled attendant at birth, compared to 88 percent of deliveries among mothers with primary education and 99 percent of deliveries among mothers with a tertiary education.
- 78 percent of newborns born to mothers with no education received the BCG vaccine, compared to 95 percent of mothers with a primary education and nearly 100 percent of mothers with a tertiary education.

## By geographic regions:<sup>2</sup>

- South East saw the highest rate of antenatal care coverage (at least four visits) of 90 percent, compared to the lowest coverage of 48 percent in Central Highlands.
- The region with the highest coverage of skilled birth attendance is Mekong River Delta with 99 percent; the lowest coverage is Northern Midlands and Mountainous area with 78 percent – a difference of 1.3 times.
- Red River Delta saw the highest rate of BCG coverage at 100 percent, compared to the lowest coverage at 94 percent in Central Highlands.

Coverage – care for newborns									Other
Postnatal care of newborns within 2 days (%)	Newborn weighed at birth (%)	Early initiation of breast-feeding (%)	Exclusive breast-feeding (<6 months) (%)	BCG vaccine for newborn (%)	Hepatitis B vaccination at birth (%)	Tetanus protection for newborns (%)	Birth registration (%)	Births by age 18 (%)#
